SOFTWARE ENGINEER | WEB DEVELOPER

Software Engineer specialising in full-stack web development to create robust, user-friendly, and secure web applications. Proficient in web techonologies such as HTML, CSS and Tailwind CSS, JavaScript and TypeScript, React, NextJS, and NodeJS, programming languages such as Python, Java, and C#, and modern technologies such as GitHub, AWS, and Docker.

Education

Bachelor of Software Engineering (Honours)
University of Newcastle (2021 – now) – expected to complete November 2024, GPA 5.9

HSC Certificate
Whitebridge High School (2015 – 2020)
- Represented my school on the top board of the chess team.

Relevant Experience

Software Engineering Work Placement
University of Newcastle | March 2024 - now
(Approximately 10 hours per week in semester 1 and 20 hours per week in semester 2)
- Supervised and managed a real-world project's development.
- Planned the project using a Gantt chart and kept track of progress using Jira.
- Designed the project using UML diagrams and maintained documentation using Confluence.
- Used the agile development methodology to streamline development and finish an initial prototype using HTML, CSS, JavaScript, NodeJS, and PostgreSQL.
- Integrated the application with third-party tools such as Canvas LMS and Google Wallet.
- Refactored the code to use React and AWS services through LocalStack.

Other Experience

Team Member – Customer Service
KFC Warners Bay | January 2021 – September 2021
(Approximately 10 hours per week casually)
- Prepared and cooked food in the kitchen, and performed routine cleaning.

- Communicate with other team members to meet deadlines during busy hours and prioritise orders.

Projects

Third Year Project
University of Newcastle (2023)
- Worked in a team of six to develop and test a full-stack web application.
- Utilised modern technologies such as React, NextJS, NodeJS, and PostgreSQL.
- Managed the code in GitHub with multiple branches, and faciliated project management and task division using Azure DevOps.

ChessPuzzler Personal Project
- Created a web application that allows users to solve chess puzzles.
- Used technologies like HTML, Tailwind CSS, JavaScript, and React.

Certifications

- Responsive Web Design, freeCodeCamp | September 2023.

Interests

- Playing and studying chess.
- Tennis and rock climbing.
